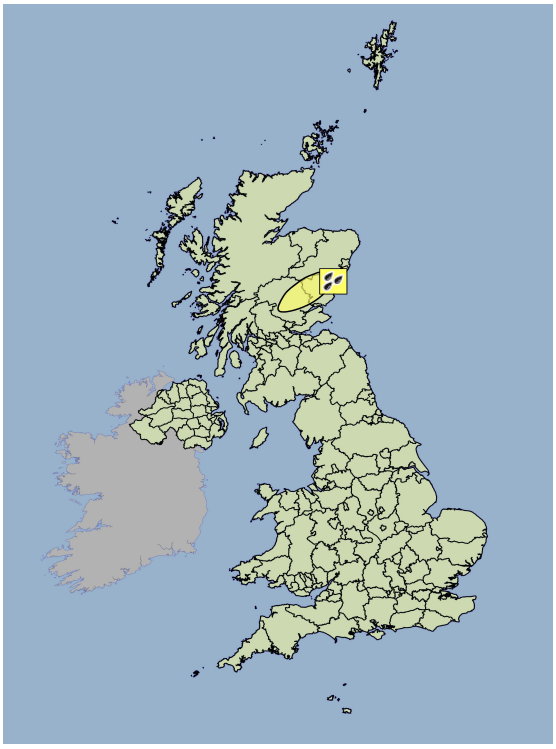
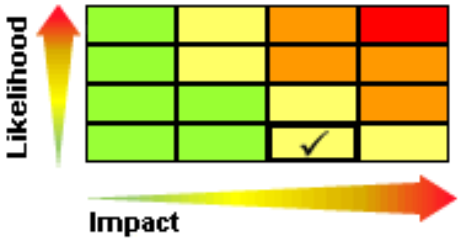
National Severe Weather Warning Service





Chief Forecasters Assessment
A frontal system will move up across Scotland over the weekend, producing some prolonged rainfall, heaviest over the high ground of Angus, Perth and Kinross, and southern Aberdeenshire where localised flooding may be enhanced by snow melt at higher levels. Rainfall totals of 20 to 40 mm are expected at lower levels with isolated peaks of over 60 mm on higher ground.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **19:00 on Sat, 18th Jan 2014** until **14:00 on Sun, 19th Jan 2014**

Bands of rain will become slow-moving across Angus, Perth and Kinross, and the south of Aberdeenshire. The rain, heaviest on high ground, will start during Saturday afternoon and last well into Sunday, before clearing from the south.

The public should be aware that this is likely to lead to some localised flooding, as well as standing water on many routes within the area.
